RE: Revised Monitoring Schedule for ALPENSEE WD
PWSID# CO0159119

Dear Ms. CUTUNILLI:

The Water Quality Control Division (the "Division") has received information that has caused changes to monitoring requirements for ALPENSEE WD (the "System"). The information and subsequent changes are listed below:

- System has completed initial monitoring at entry point facility 004. Based on the results, the System has been reduced for inorganics, fluoride, and synthetic organics to a three year schedule beginning in 2014. Volatile organics and nitrate have been reduced to an annual frequency beginning in 2013. Nitrite has been reduced to a nine year schedule, beginning in 2020. No further quarterly monitoring in 2012 is required.

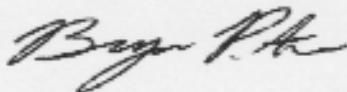

Please record the above changes in the sampling plan section of your systems monitoring plan. A copy of the updated section needs to be submitted to the Division within 30 days from the receipt of this letter. Copies of the monitoring plan templates can be found on our website:

www.cdphe.state.co.us/wq/drinkingwater/index.html

You may download your 2012 Annual Monitoring Schedule online at: <http://wqcdcompliance.com/schedules>. You will need your PWSID#. If you have any problems accessing your Monitoring Schedule or if you don't have computer access, please call 303-692-3541 and request a copy.

If you have any questions, please contact me at 303-692-3318 or by electronic mail at bryan.pilson@state.co.us.

Sincerely,

A handwritten signature in cursive script, appearing to read "Bryan Pilson".
